Lineal Privileged Communication Review

MINIMIZE REVIEW COSTS AND CLAWBACK RISKS WITH PRIVFINDER

Designed to drastically cut down on review costs and mitigate the risk of clawback, PrivFinder offers a highly efficient solution for identifying attorney-client communications. Our AI model is not only sophisticated but also smartly integrates with RelativityOne and Server, ensuring a blend of technology, process, and expert knowledge.

BETTER WORKFLOW FOR PRIVILEGED COMMUNICATION DETECTION

PrivFinder simplifies the process of detecting privileged communications through the following workflow:
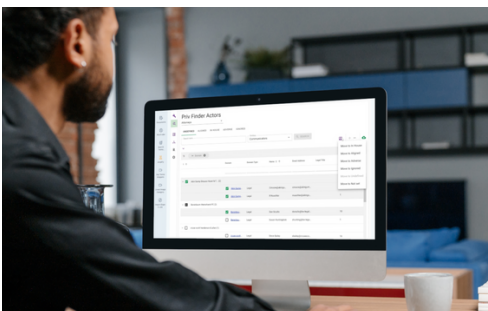

AUTOMATED LAWYER IDENTIFICATION

PrivFinder discovers lawyers without user input, analyzing legal domain associations, roles of communicators, and employing AI Bot Detection to filter out irrelevant emails such as law firm marketing communications.

TAILORED REVIEW

Case teams input details about aligned and adverse lawyers, as well as inside counsel, for a more effective review process.

PRIVILEGED SCORES AND REASONS

Scores are published within Relativity, accompanied by the reasoning behind the classification.

BOTDETECTOR INTEGRATION

This feature refines results linked to keyword terms, enhancing accuracy.

FAST QC AND MASS TAGGING

See context snippets presented for rapid quality control and mass tagging.
