

Privilege Log Production with PrivFinder

Lineal's use of Lineal Images streamlines redaction and sampling, enhancing efficiency in large-scale document reviews.

BACKGROUND

A legal team faced the daunting task of reviewing and creating a privilege log for 25,000 documents in under 48 hours.

CHALLENGE

The objective was to establish a cost-effective and defensible workflow to rapidly produce a privilege log within a constrained timeline.

APPROACH

PrivFinder Integration

Lineal integrated PrivFinder to swiftly pre-identify documents likely to be privileged based on predefined search terms.

Waterfall Review Process

A structured waterfall review approach was executed, allowing for efficient prioritization and examination of documents.

Contextual Analysis with Snippets

Utilizing the Snippets tool, the team performed a focused review of key terms in context, enhancing the precision of privilege determinations.

OUTCOMES

25,000 documents reviewed within the timeframe

Production completed within **48 hours**

60% of documents processed into privilege log

25% reduction in time and cost compared to standard

Privilege log **accepted with no objections**
