

## CASE STUDY

# Seamless Migration from Relativity Server to RelativityOne

Lineal partnered with an AmLaw 200 firm to execute a secure, disruption-free migration of 30TB of data to RelativityOne — enabling greater scalability, stronger security, and modern analytics capabilities.

## CHALLENGE

An Am Law 200 firm needed to migrate from its legacy Relativity Server environment to the cloud-native RelativityOne platform. The goal was to modernize the firm's eDiscovery infrastructure without impacting active case teams or risking downtime. With rising client expectations and increasingly complex cases, the transition had to be executed with precision.

## OUR APPROACH

Lineal delivered a fully managed, end-to-end migration designed to maintain continuity and elevate the firm's long-term capabilities.

- Strategic consulting to analyze existing workflows, permissions, and active projects
- Secure transfer of ~30TB of data with complete chain of custody
- Seamless user continuity planning to ensure ongoing case access
- Customized training sessions for case teams on RelativityOne and the Lineal Amplify suite
- A tightly coordinated project plan enabling a smooth transition within two weeks

## OUTCOME

The firm successfully modernized its eDiscovery environment without interruption, achieving both immediate and long-range benefits. The firm now operates with a future-ready discovery infrastructure built for speed, security, and growth.
